## R44 AND R66 GROUND HANDLING WHEELS

P/N:AM-RDM-66

Alternative Part Number :  
BDW-206JR

### DESCRIPTIVE \_\_\_\_\_

Ground Handling Wheels, double type, for installation on the skis of the Bell 206 Jet Ranger helicopter, of high ski. The HELIMOB 206 equipment has the function of suspending the aircraft from the ground and making it possible to move the landed helicopter. Equipment with highly reliable mechanical drive, free of hydraulic systems / leaks and dependence on batteries.

This equipment replaces the PN BDW-206JR

### DIFFERENTIALS \_\_\_\_\_

- Quick lift action;
- Quick and convenient fit to the ski;
- Lighter ground rolling movement than traditional systems;
- Skis higher off the ground, enabling movement on terrain with some irregularity/inclination. Thus preventing ground drag and ski damage (consult us for more details);
- Robust construction and high reliability;
- Compact equipment, allowing transport inside the aircraft's luggage compartment;
- State-of-the-art equipment, compatible with the level of your operation.

### TECHNICAL SPECIFICATIONS \_\_\_\_\_

- Constructed in steel with Molybdenum alloy to support high load, being compact and light;
- Screws, pins and miscellaneous stainless steel;
- 74psi pneumatic-type prime tires;
- High durability Epoxy paint;
- Built to eliminate unnecessary twisting efforts on ski lock pins;
- Product with full assistance and availability of spare parts;
- Built in accordance with NBR8400, NBR10474 and NBR6171;
- All equipment with 1 Year Warranty;
- Equipment Registered® and with trademark patent by INPI – National Institute of Industrial Property and by WIPO – World Intellectual Property Organization.

### INCLUDED ITEMS \_\_\_\_\_

- 2 Ground Handling Wheels (1 PAIR)
- 1 One-piece metal lever bar with locking system.
